

Creating Local Odawara Energy, “Houtoku Energy” begins

December 2012, 38 companies invest in the local venture, Houtoku Energy.
We are a community based energy company
which makes renewable power plant with community fund.

Community Mega Solar Project

A 1.7 MW Mega Solar farm in
the hills and forests of Odawara.

Rooftop Rental for Solar Panels

Solar panels installed on rented space
at 5 municipal buildings; schools, etc.
164KW of electricity generation

Solar for free

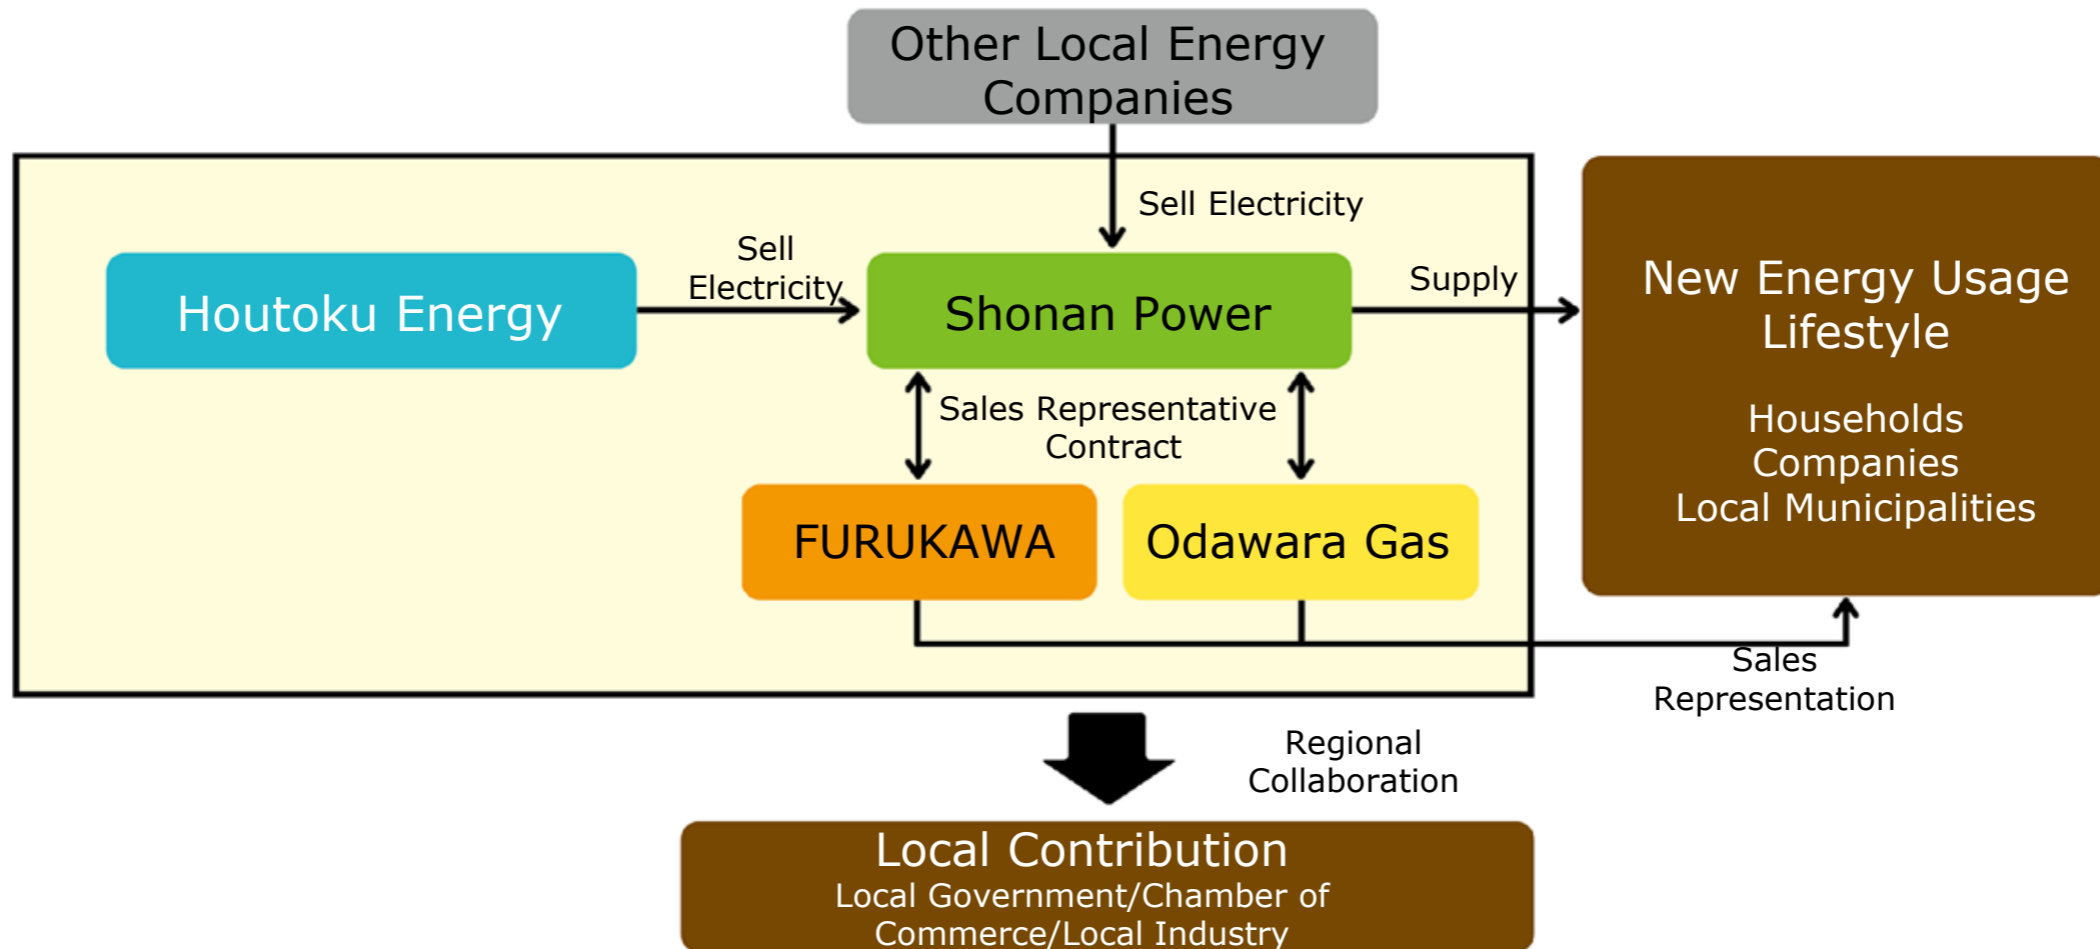

Free initial cost to commercial
facilities for installation.
30KW of electricity generation

Producing 1.9MW of Electricity (As of June 2017). Enough for 580 households.

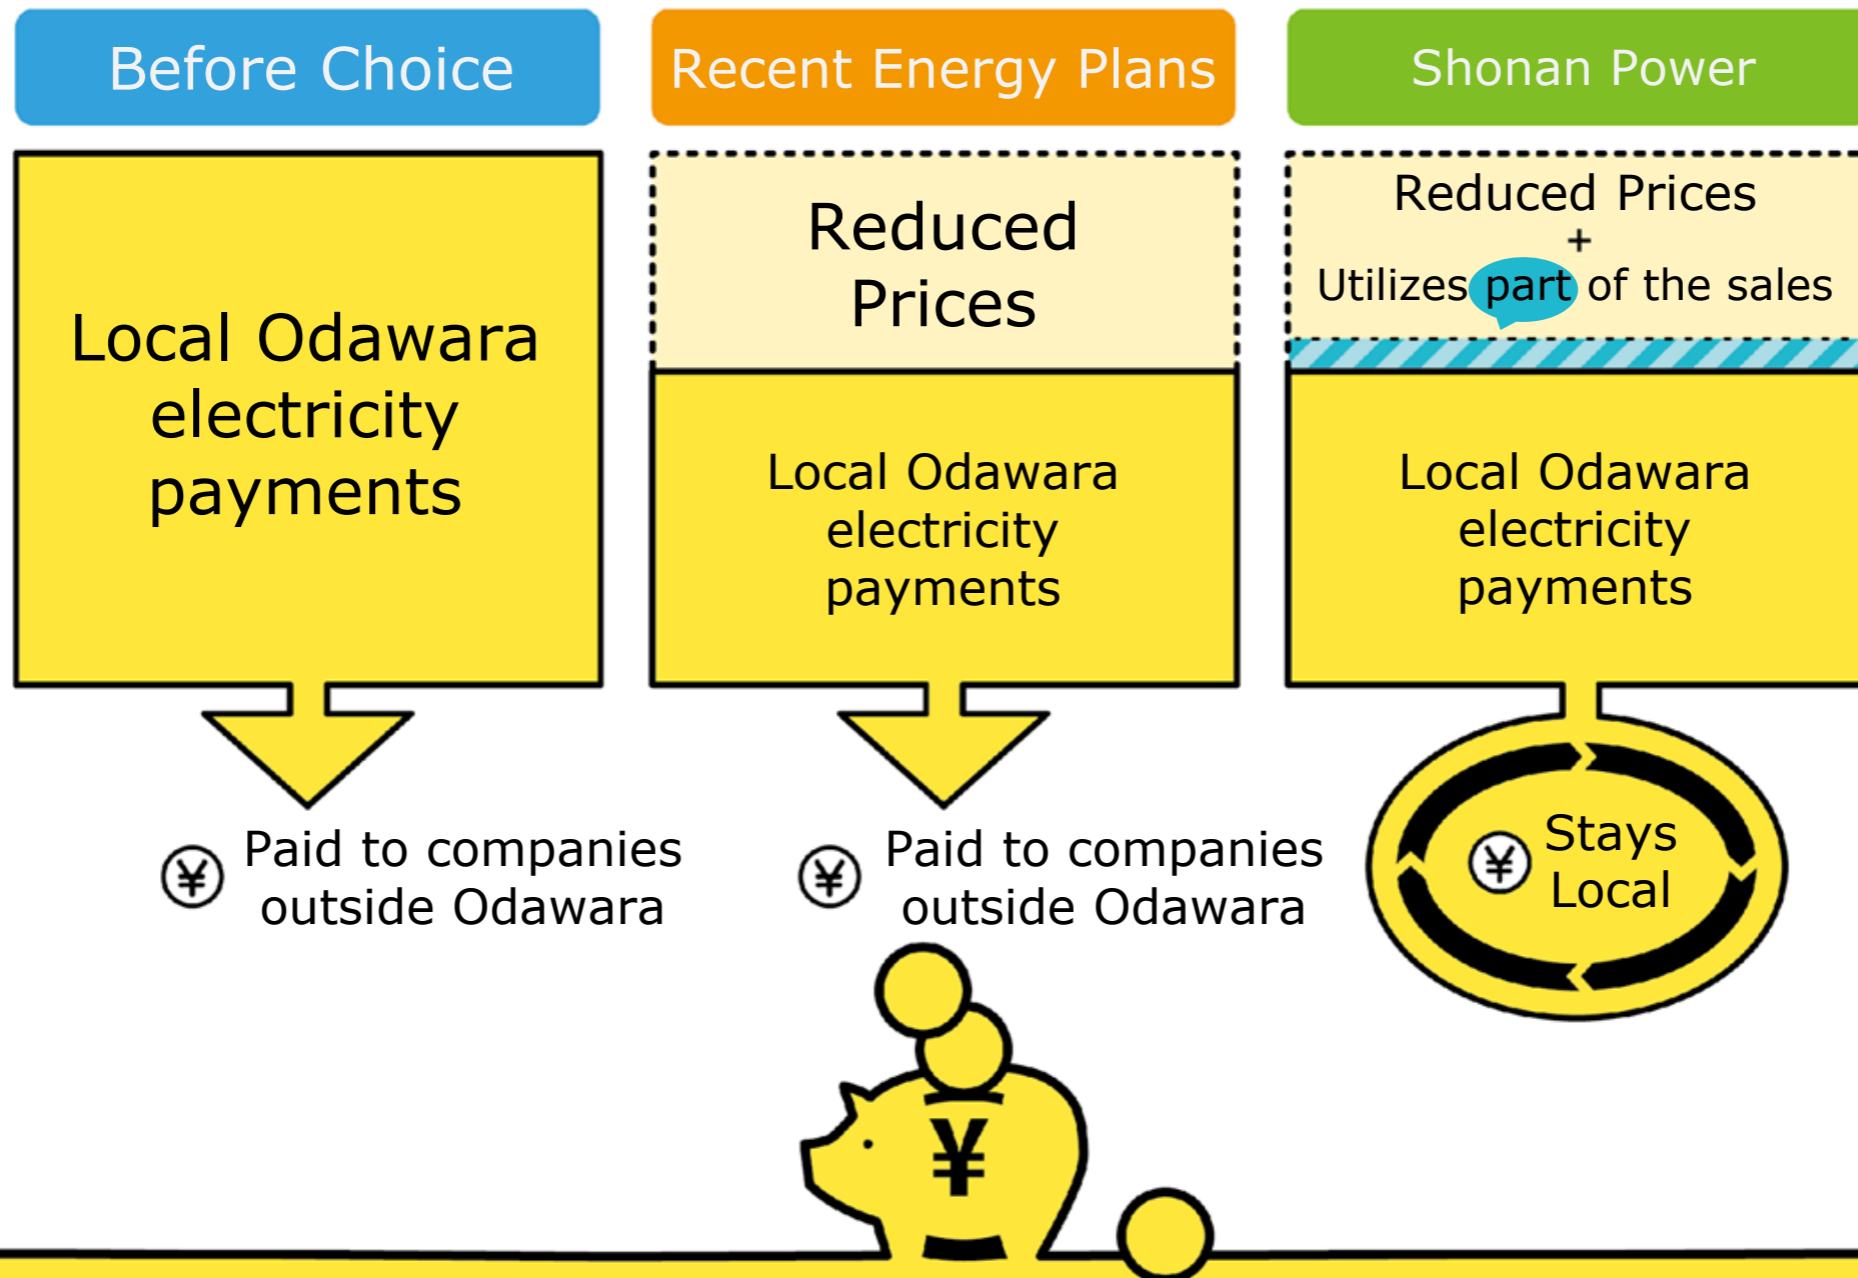

Local Electric Teamwork, By Odawara Citizens, For Odawara Citizens

TEAM

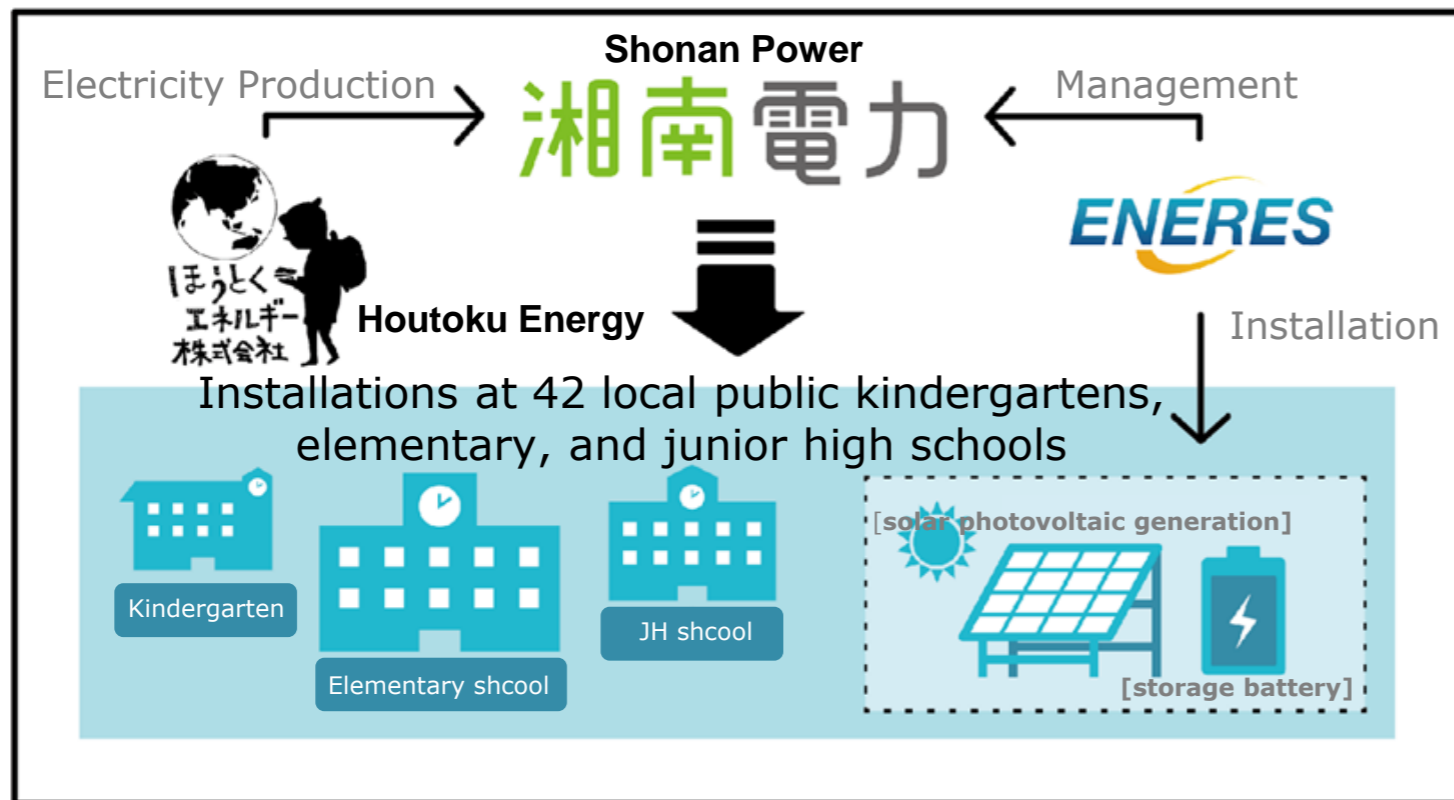

We want to create a more beneficial electricity supply structure for Odawara

Working with 42 Local Kindergarten, Elementary, and Junior High Schools in Odawara

We were selected as a best proposal at "The Odawara City Energy Model for Promotion of Self-Sufficiency". Starting in December 2017, we will begin supplying and producing electricity for 42 local kindergartens, elementary, and JH schools in Odawara to save on energy payments.

Local Merits

- ① Lower Energy Prices
- ② Keeping Money Local
- ③ Free Storage Battery and Panels
→ Can also be used during disasters

Installation of power generation facilities at 7 local elementary schools, free of charge

"Changing Odawara`s Energy Model"

Creating Electricity in Odawara, Energizing Odawara !

Local companies generate and supply energy, creating a reliable and economic source of energy even in times of natural disaster.

Furthermore, a larger part of energy payments stay in the local area. This economic infusion strengthens the local economy and connects community.

What are the challenges? How do we solve them?

We hope that you will participate, and we can think of solutions together.

Let`s start a new era of Odawara Energy!
