URBAN TRANSFORMATION TO A CIRCULAR ECONOMY

LOCAL RENEWABLES CONFERENCE 2018
24-26 October 2018, Freiburg (DE) and Basel (CH)

The City of Freiburg, the City of Basel and ICLEI Europe are pleased to invite you to the conference:

LOCAL RENEWABLES CONFERENCE 2018
24-26 October 2018, Freiburg (DE) and Basel (CH)

Rising global material- and energy needs remain a major challenge, with cities and regions being central players in making energy more secure, clean and sustainable. To transform from a linear to a circular economy there is a growing need to take advantage of renewable resources, including energy. The conference will address the following key issues:

- What role does renewable energy play in a circular economy?
- How can cities manage the transformation from a linear to a circular economy? And what is the role of sector integration?
- What investments are needed and what are the financing options?
- What social implications does the transformation have?
- How can relevant stakeholders, such as citizens, public authorities and the private sector be engaged?

With about 150 participants Local Renewables will bring together leading and learning cities, policy-makers from European and national governments, business, research and finance institutions. Building on the success of previous editions, the conference will showcase practical and innovative examples of how actors in urban, industrial, and rural areas are dealing with rising material and energy needs and building a circular economy. Visit our website for more information and to download the conference programme.
